HIGH-END HOMEWARES TO MAKE YOUR LIFE GLOW

www.glowglow.com.au

Floating in a rooftop pool at a new iconic Sydney venue is just one premium location you'll find a piece from the illuminated GLOW range – will your place be next?

Suitable for indoor and outdoor use, this versatile collection of illuminated furniture and entertaining-ware are lit from within by remotely operated LED (light-emitting diode) lamps and make a distinctive statement in any home, alfresco or are suited to a wide range of commercial applications.

Indeed, "versatile" is the perfect word to describe GLOW: weatherproof for any situation; classy white finish by day, LED-lit after dark and many of the pieces are designed for multiple uses all year round, such as the flower pots that double as an ice bucket or the cube bench tables and storage seats.

Through the infrared remote control you can customise your GLOW product to operate to suit your needs: stay on one colour or fluctuate through many different colours.

The GLOW collection includes flower pots in a range of sizes from small to larger models and square planters, cube seats and bench tables, curly bench tables, ice buckets, floating spheres for in or out of your pool, tear drop lamps, saucer lights perfect for garden borders and pathways and short or tall tower lights.

GLOW tables range from glass tops and coffee-table style bubble tables to taller cocktail style tables, to a series of martini-glass style tables. The range of bars are striking for any venue or function and includes an all in one bar unit or modular pieces to suit the space or need, which can even double as a reception desk! You can spot a GLOW bar being used a DJ console for Nova 93.7's outside broadcast each Sunday night at Hillary's Breakwater Tavern.

Every product in the GLOW range can be customised with a corporate logo or personal message making them ideal for sales promotions, corporate branding or themed events such as weddings and other celebrations.

A new company based in Perth, GLOW has developed this exclusive range with a unique UV protection formula especially suited Australia's harsh conditions, made from resilient plastic resin or fibreglass. Cutting edge technology that makes these products as energy efficient and resilient as they are striking, and built to meet Australian Standards.

GLOW products are lightweight and mobile with the products being able to run on rechargeable batteries or AC power. The LED lamps within the have a lifespan of up to 100,000 hours, and all come with a 12-month warranty.

The online store is now open at www.glowglow.com.au
