Add some bright funky fun with sound to your home entertaining or business with the Glow Illuminated Sound Cubes. They are as versatile as the colours and sounds they project. Add them to any area inside and out as a seat or table and because they're cordless and lightweight they can move wherever you do.

The Glow Sound Cube utilises cutting edge Glow LED technology and the resilient UV protected plastic resin cube design with the latest in Bluetooth sound technology.

The Glow Sound Cube adds more functionality to the cube seat versatility. By allowing users to not only have a seated cube that lights up from within scattered around the home or commercial venue, they now also can be used to stream music directly to built in speakers via a Bluetooth device such as a phone or tablet

The flexibility of the cube design with its rechargeable internal battery, will allow for the cube to operate completely wirelessly. This means the cubes can be used in areas without a power source such as an outside courtyard or even at the beach. Also by operating wirelessly it removes any safety hazard of tripping over wires.

The Glow Sound Cubes are available in sizes of 20cm or 40cm squared.
